Methamphetamine use: A comprehensive review of molecular, preclinical and clinical findings

Tuberculosis, injecting drug use and integrated HIV-TB care: A review of the literature
Grenfell, Pippa - Baptista Leite, Ricardo - Garfein, Richard - de Lussigny, Smiljka - Platt, Lucy - Rhodes, Tim Pages: 180

Efficacy of buspirone for attenuating cocaine and methamphetamine reinstatement in rats
Shelton, Keith L. - Hendrick, Elizabeth S. - Beardsley, Patrick M. Pages: 210

Serotonin transporter and receptor genes significantly impact nicotine dependence through genetic interactions in both European American and African American smokers
Yang, Zhongli - Seneviratne, Chamindi - Wang, Shaolin - Ma, Jennie Z. - Payne, Thomas J. - Wang, Jundong - Li, Ming D. Pages: 217

Cocaine synergism with alpha agonists in rat aorta: Computational analysis reveals an action beyond reuptake inhibition
Lamarre, Neil S. - Raffa, Robert B. - Tallarida, Ronald J. Pages: 226

γ-Amino butyric acid and glutamate abnormalities in adolescent chronic marijuana smokers
Prescot, Andrew P. - Renshaw, Perry F. - Yurgelun-Todd, Deborah A. Pages: 232

Concurrent choice for social interaction and amphetamine using conditioned place preference in rats: Effects of age and housing condition
Yates, Justin R. - Beckmann, Joshua S. - Meyer, Andrew C. - Bardo, Michael T. Pages: 240

Effects of environmental enrichment on nicotine-induced sensitization and cross-sensitization to d-amphetamine in rats
Adams, Emily - Klug, Jenna - Quast, Michaela - Stairs, Dustin J. Pages: 247

NKAIN1–SERINC2 is a functional, replicable and genome-wide significant risk gene region specific for alcohol dependence in subjects of European descent
